Fountain Valley, CA 92708

Dear Hiring Manager:

I am glad to be an applicant for your business. My goal is personal growth, which is an excellent opportunity for me to apply. I'm a student who enjoys learning that enhances my skills, and be open to gain new knowledge is my hobby. I am invested heavily in science and robotics that gave me experiences in 3D design, coding electronics, website design, and much more. As a competitive person, researching and strategizing is my style: and learning is my forte.

Throughout my senior year at high school, I have gained many experiences. As a team member of Fillosophy in Virtual Enterprise taught me to become an independent learner by learning and experimenting with HTML, CSS, JS, and using source code libraries. When my teammates require assistance, I would make sure to help them get their work done. During the trade show competition, I made sure to welcome the guest, read the room, and show that Fillosophy products are best at being environmentally friendly and saving more expenses. As a MIRE student, I have gained experience in public speaking, teamwork, and planning ahead. Being able to pitch to investors gave me an insight into how businesses go through the challenges of gaining investors. I believe that at this early phase of my career that this role offers a perfect way for me to continue sharpening my mentioned skills, and be more open to new methods of creativity. Thank you for your time and consideration.

Sincerely,

Jenny Pham
